

UNIVERSITY OF GUELPH

Basis and Timing of Offers of Admission

The University of Guelph will begin making offers of admission in February to applicants with high academic standing. Early offers of admission may make use of 3U and/or 3M grades. Offers of admission will be made on a rolling basis until late May. All students with an admission average of 75% or higher will be considered for admission. Student Profile Forms will be reviewed in May to consider applicants who fall within 5% of the established cut-off. Some programs may have additional requirements, including higher final admission averages. All offers are conditional upon the completion of all secondary school diploma requirements including a final admission average as specified in the offer letter. The final admission average is calculated using six 4U and/or 4M courses including required subjects.

Alternate Offers: Normally, applicants can expect to receive only one offer of admission from Guelph. The highest choice to Guelph will be considered first. The next choice is only considered if the applicant is not admissible to his/her highest choice at Guelph. For this reason, applicants are strongly advised to place their preferred program as their highest choice of Guelph programs. Students who apply for, but are not admitted to, a co-op program will be automatically considered for the regular program. These students may re-apply to co-op after their first year of study at the University of Guelph.

Student Profile Forms: At the University of Guelph, we recognize that non-academic factors play an important role in students' lives. The Student Profile Form (SPF) is your opportunity to tell us about activities in which you may have been involved and that have helped you develop leadership and citizenship qualities. Factors beyond your control that have negatively affected your academic performance, such as illness or personal problems, will also be considered when making decisions.
