

UNIVERSITY OF WINDSOR Basis and Timing of Offers of Admission

The University of Windsor will inform all applicants regarding the status of their application beginning in early April. Windsor intends to make admission offers to most programs from early April to June. Admission offers to programs that require the completion of supplemental applications and subsequent auditions and/or interviews will be made after these activities have been completed. Applicants who need to complete supplemental applications will be sent this material when their OUAC application is received. A response deadline applies; contact the Liaison Office if you have not received your supplemental application package by February 25.

Consideration for admission in April requires grades in a combination of at least three 4U or 4M courses and registration in, or completion of, at least six of these including all 4U prerequisites. These offers will be conditional upon completion of the OSS Diploma. For admission purposes, the average of the best three 4U or 4M courses, regardless of the number completed or in progress, will be calculated. Applicants not considered for early admission will be considered for admission based on the average of their best six 4U or 4M courses, interim or final, following receipt of interim grades.

Students not accepted into the program of their choice at Windsor will be considered for alternate offers.
